# **FTC-111 Cooling Water Treatment**

Markem™ **FTC-111 Cooling Water Treatment** is composed of sequestering agents, polarizing materials, dispersants and anti-film, and foaming agents, which provide an extremely powerful corrosion- and scale-inhibiting effect. It also provides dispersancy for iron oxides and airborne particulate matters.

## **Application**

Markem FTC-111 Cooling Water Treatment can be applied directly on the water or through the use of proportions recommended in your water analysis.

#### **Benefits**

- Increase cooling and heating system efficiency
- Passivates heating system to prevent further corrosion
- · Safe to use
- · Does not harm the surfaces of the metal

### **Typical Physical Properties**

Color Light Yellow Odor

Odorless

**pH** 2.47

**Specific Gravity at 250C** 

1.02

Solubility

Soluble in water, Insoluble in most solvent

Form Liquid

# Available in the following packaging:

1-Liter Bottle / 4-Liter Gallon / 20-Liter Pail
