Radiator Flush

KEVLON

Kevlon™ **Radiator Flush** is a chemical compound specifically formulated to speed up the removal of rust, scales, dirt, etc. formed within the radiator cooling system. It prevents overheating, build-up acids, and contaminants.

Application

Add Radiator Flush to water in radiator in dilution of one (1) part to five (5) parts of water or depending on the dirt to be cleaned. Start engine and keep it running for about 20 minutes depending upon the nature of the rust, scales and dirt present. Drain and rinse off. For best results, keep solution in the system for a few hours before draining.

Benefits

- Easy to use
- Safe on all metals
- Improved cooling system performance after use

Typical Physical Properties

Appearance
Clear / Yellow

Odor
Mild / Lemon Scent

pH
2 - 3

Specific Gravity
1.0 - 1.3

Flammability
Non-flammable

Available in the following packaging:

1-Liter Bottle / 4-Liter Gallon / 20-Liter Pail / 400-Liter Drum
